DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 32 drawn to product and process of producing polyimide film having symmetric and asymmetric tetracarboxylic acid component

Group II, claim(s) 7-16 drawn to product and process of curing precursors of polyamic acid (intermediate of polyimide) having symmetric and asymmetric tetracarboxylic acid component

Group III, claim(s) 17-25 drawn to product and process of curing precursors of diester/diamine or polyamic acid (intermediate of polyimide) having symmetric and asymmetric tetracarboxylic acid component or polyamideimide

Group IV, claim(s) 26-31 drawn to product and process of applying precursors of diester/diamine (intermediate of polyimide) having symmetric and asymmetric tetracarboxylic acid component.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is polyimide and its precursor having symmetric and

asymmetric tetracarboxylic acid component reacted with diamine. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. **Masatoshi et al.** (*Macromolecules* 1999, 32, 387-396, listed on IDS) discloses a polyimide prepared from thermal imidization of its precursor prepared from a symmetric tetracarboxylic acid component (*s*-BPDA), asymmetric tetracarboxylic acid component (*a*-BPDA), and a diamine of PDA (Abstract).

Page 3

A telephone call was made to Eugene Varndell Jr. on 03/19/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Affirmation of this election must be made by applicant in replying to this office action. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHANE FANG whose telephone number is (571)270-7378. The examiner can normally be reached on Mon.-Thurs. 8 a.m. to 6:30 p.m. EST..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on (571) 272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
